

Skin Analysis Test Using AI Technology

with  **GOMLA**
GOMLAT AL GOMLA

Fast, Accurate
and Easy to Use

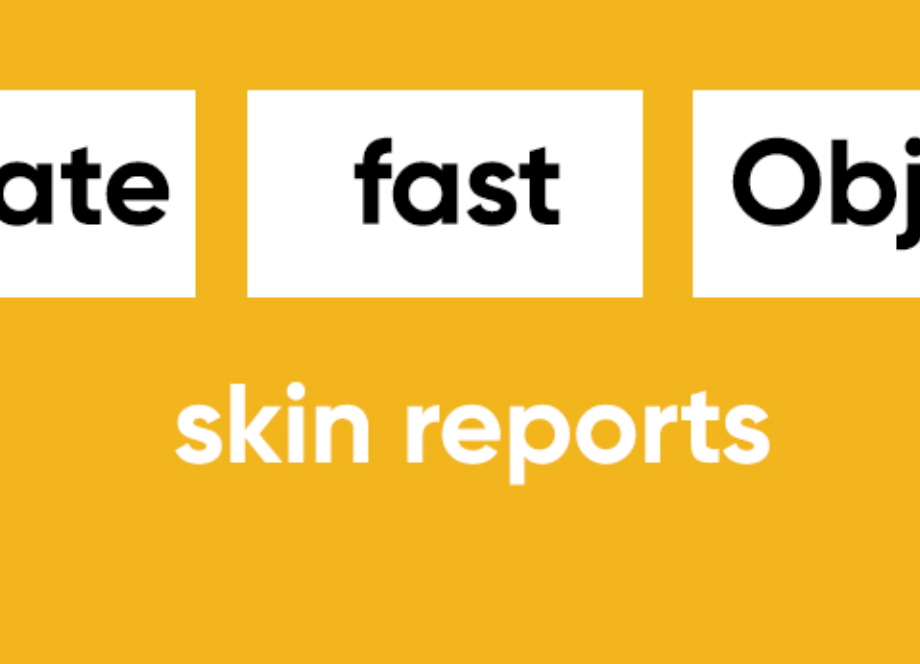

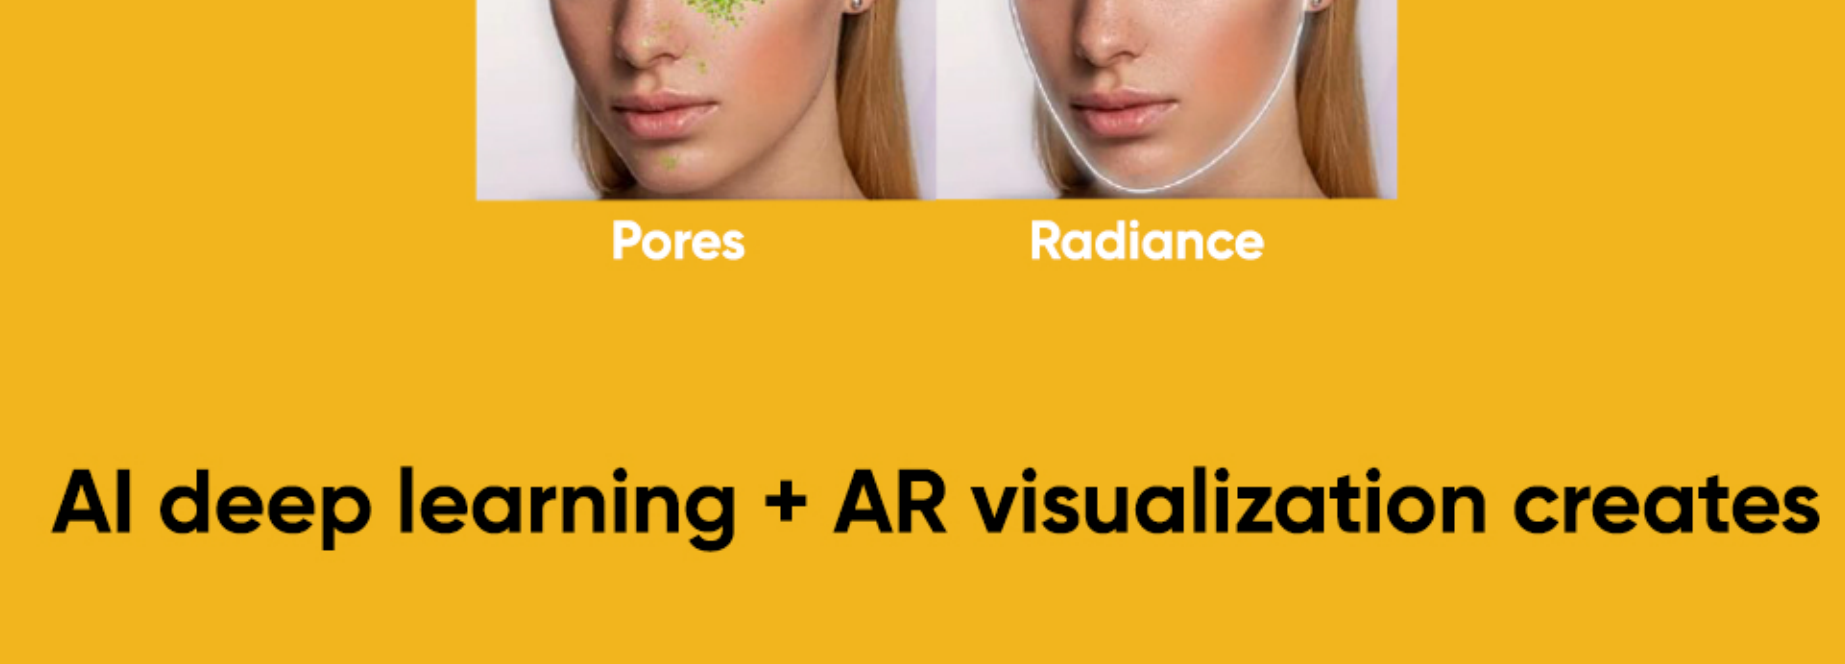

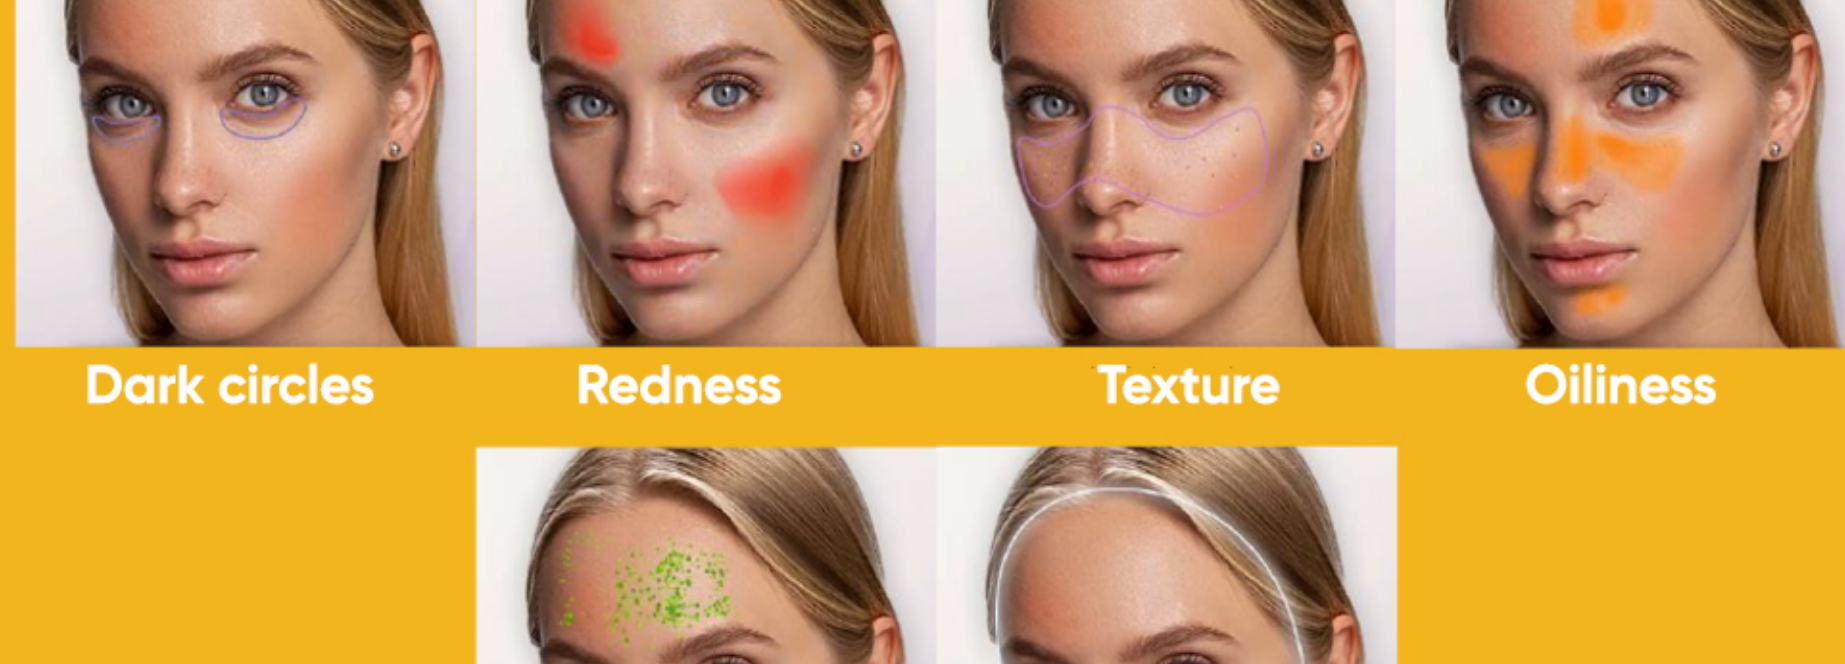

Skin Analysis Test Using AI technology

verified by dermatologists
for the Most common skin
problem

GOMLA RIGHT IN YOUR HANDS

The most common skin problems

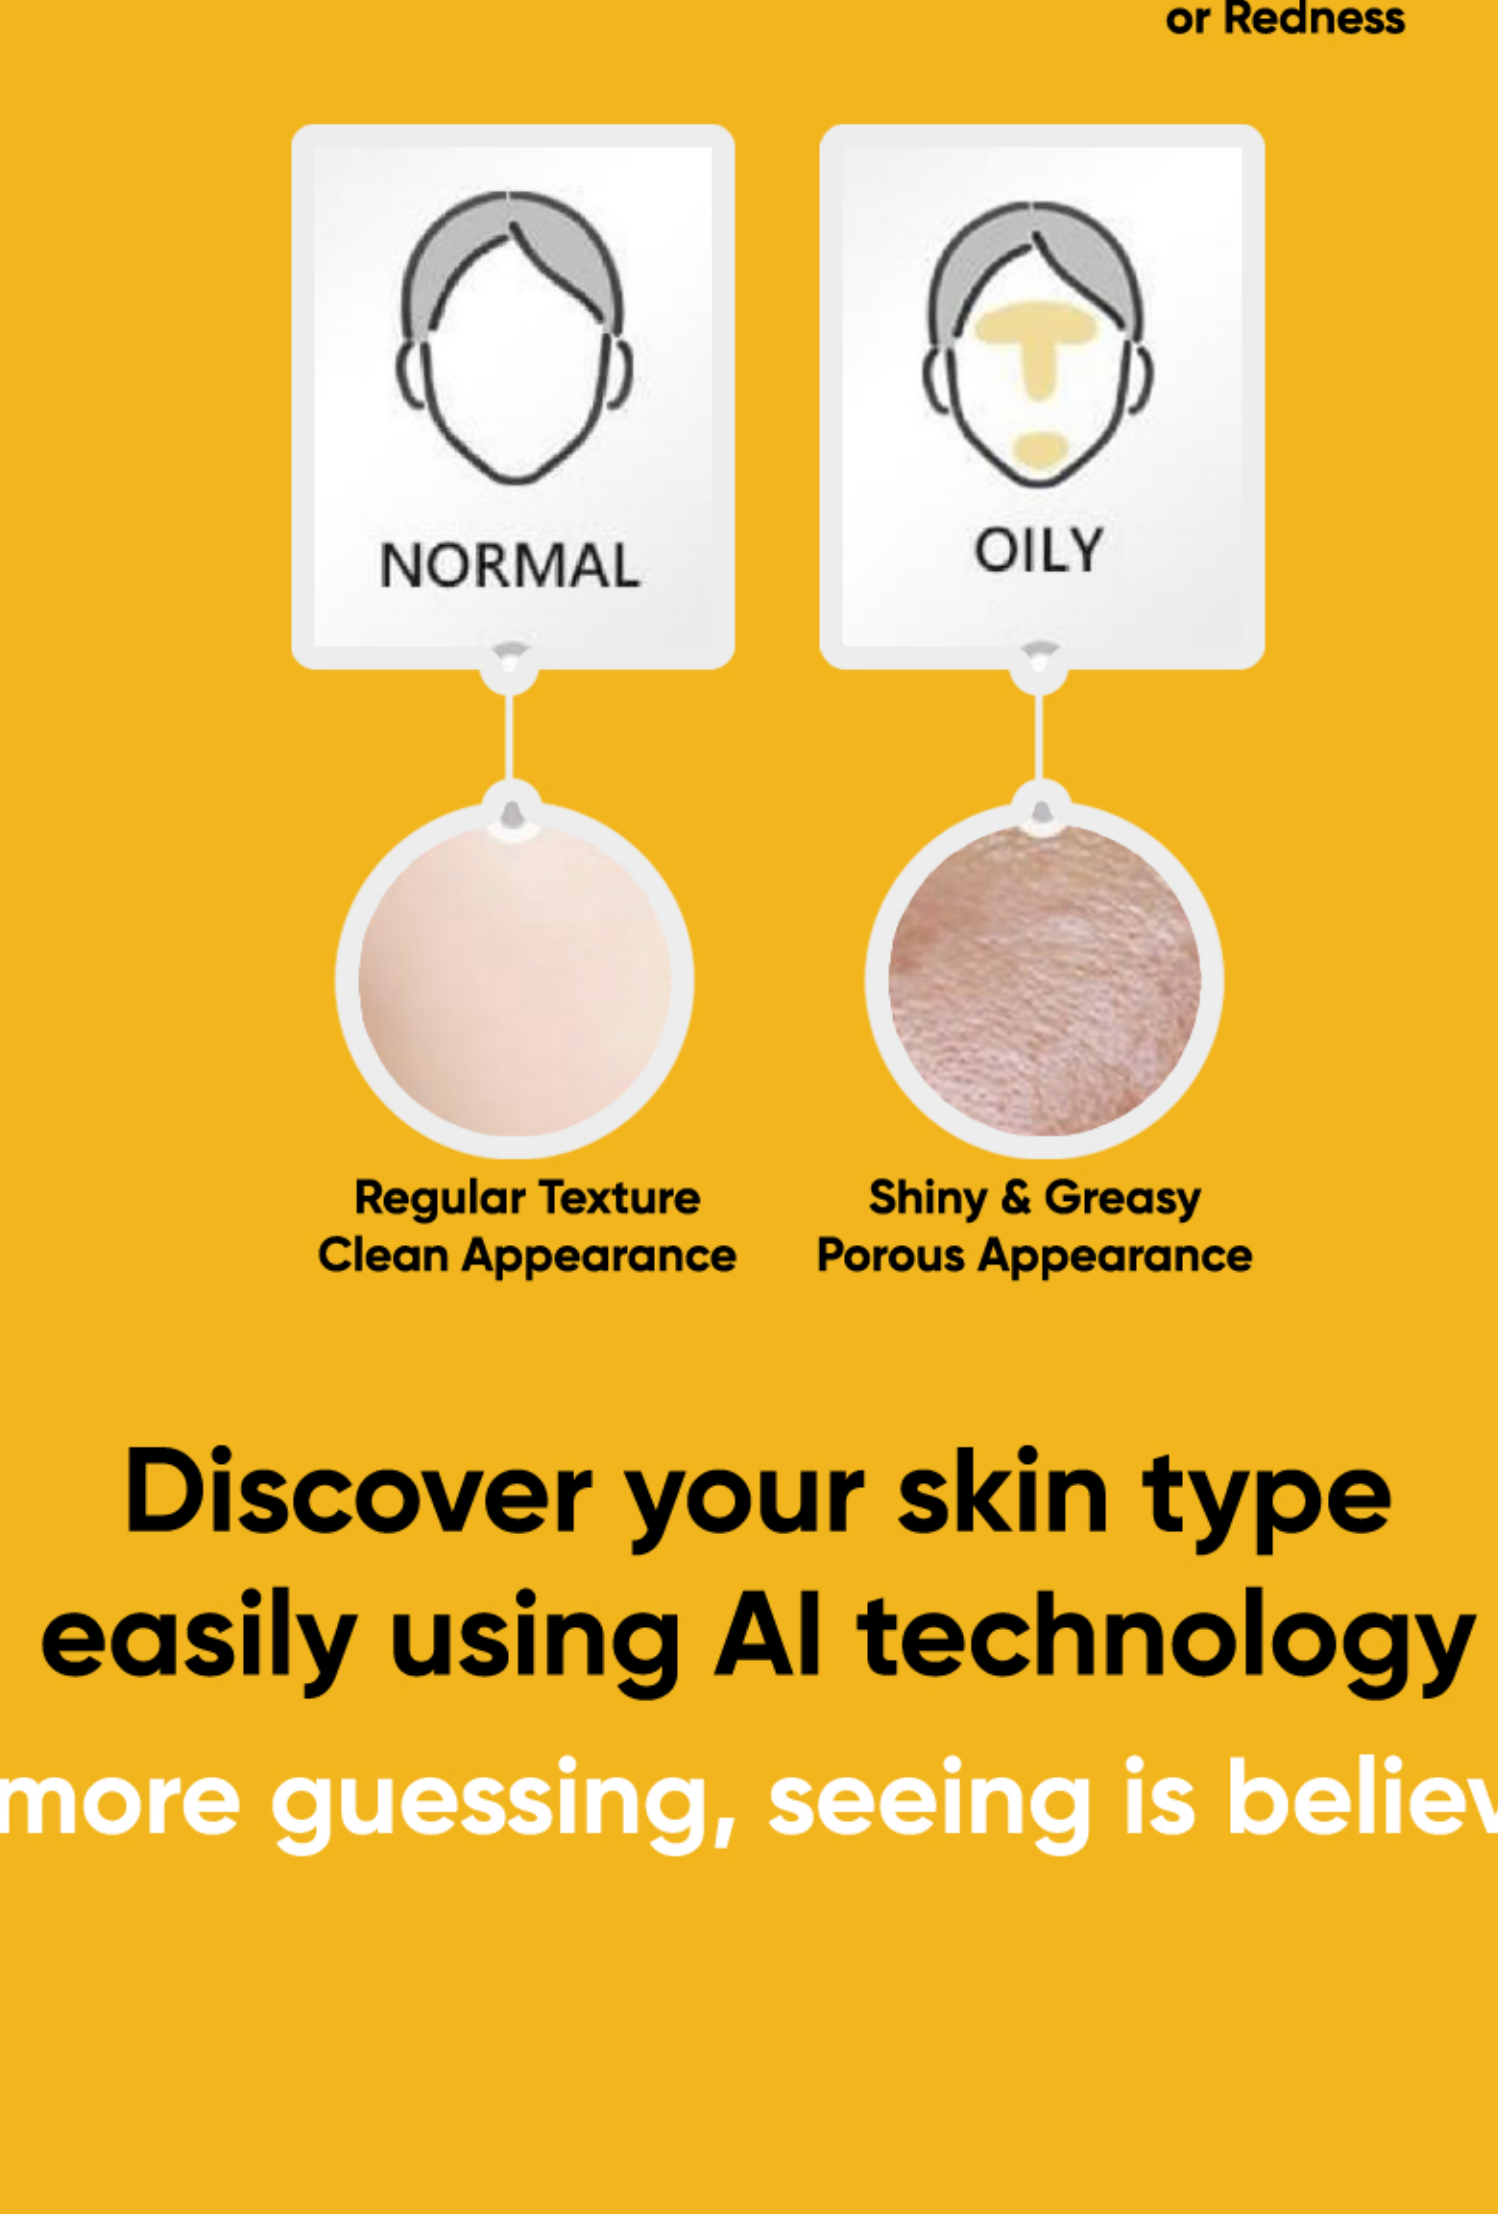

AI deep learning + AR visualization creates

Accurate **fast** **Objective**

skin reports

Skin type recognition technologies

Discover your skin type
easily using AI technology

no more guessing, seeing is believing

Advantages of Skin Analysis Using AI technology

Reliable Results

High reliability in testing and re-testing results for the ten most common skin issues, and this provides reliable analysis regardless of location, time, period, and operating system

Consistent Results

Capable of delivering consistent and accurate results regardless of skin types, skin tones, age groups, gender, lighting conditions, camera quality, or environmental differences

Ease of Use

By downloading GOMLA application on google play and Apple Store and performing test in just a few seconds.

Extremely Fast Analysis

The skin analysis program using artificial intelligence provides results 20 times faster than traditional imaging systems used in clinics, offering immediate and accurate analysis

High-Level Professional Accuracy

The skin analysis process uses AI to match medical-grade precision, ensuring exceptional accuracy and reliability for the program

Comparison of Skin Analysis Results Using AI Technology vs. Dermatologists
